CARDIOVIT FT-1

For users who value state-of-the-art technology:

- Power and flexibility in a portable ECG
- Bidirectional Wi-Fi communication
- Culprit Coronary Artery Algorithm™ for early STEMI detection

UNIQUE DESIGN

The CARDIOVIT FT-1 is an ultra-portable device, weighing just over a kilo including the battery.

The 8-inch high-resolution multi-touch screen can be operated with a simple swipe gesture.

The completely flat and closed surface of the device is very easy to clean and highly hygienic.

ALWAYS CONNECTED

Bidirectional communication allows for easy data access, while Wi-Fi as a standard feature enables the direct and fast transmission of ECG reports to an EMR system. Easy Wi-Fi connectivity, combined with ECG preview on a large display, supports paperless workflows and cost saving.

HIGHLY ACCURATE DIAGNOSES

SCHILLER's most advanced algorithms are implemented in the CARDIOVIT FT-1.

ETM: One of the industry's most renowned, simultaneous 12-lead ECG interpretation programs for uncompromising quality and reliability.

CCAA: SCHILLER's Culprit Coronary Artery Algorithm is used in emergency departments and outside the hospital whenever a fast decision on chest pain is required immediately. It locates the obstruction site in the coronary artery and thereby the size of the cardiac area at risk.

PAEDIATRIC ECG: Thanks to very high sampling frequency, the CARDIOVIT FT-1 offers optimal signal quality which makes it the ideal tool for paediatric ECGs.

1 The high-precision thermal printer (8 dots/mm) is designed to last for many years of trouble-free operation.

2 The anatomical hook up adviser helps to place the electrodes correctly with zoom-in and rotate functions for optimal view.

3 ECG overview of all 12 channels including colour-coded lead quality check

4 In case of lead reversal, warnings for limb or chest leads are immediately displayed before ECG acquisition.

EASY 1-2-3 STEPS

- 1: Enter or download patient data
- 2: Control signal quality and perform ECG
- 3: Review ECG before storing, exporting or printing

Users are free to go back and forth through the steps.
