

CARDIOVIT PRO PC System

Sophisticated ECG solution
on your computer

SCHILLER
The Art of Diagnostics

CARDIOVIT PRO PC System

CARDIOVIT PRO PC System supports integrated continuum of care with wireless ECG acquisition and management solutions that transform your computer into an advanced diagnostic system.

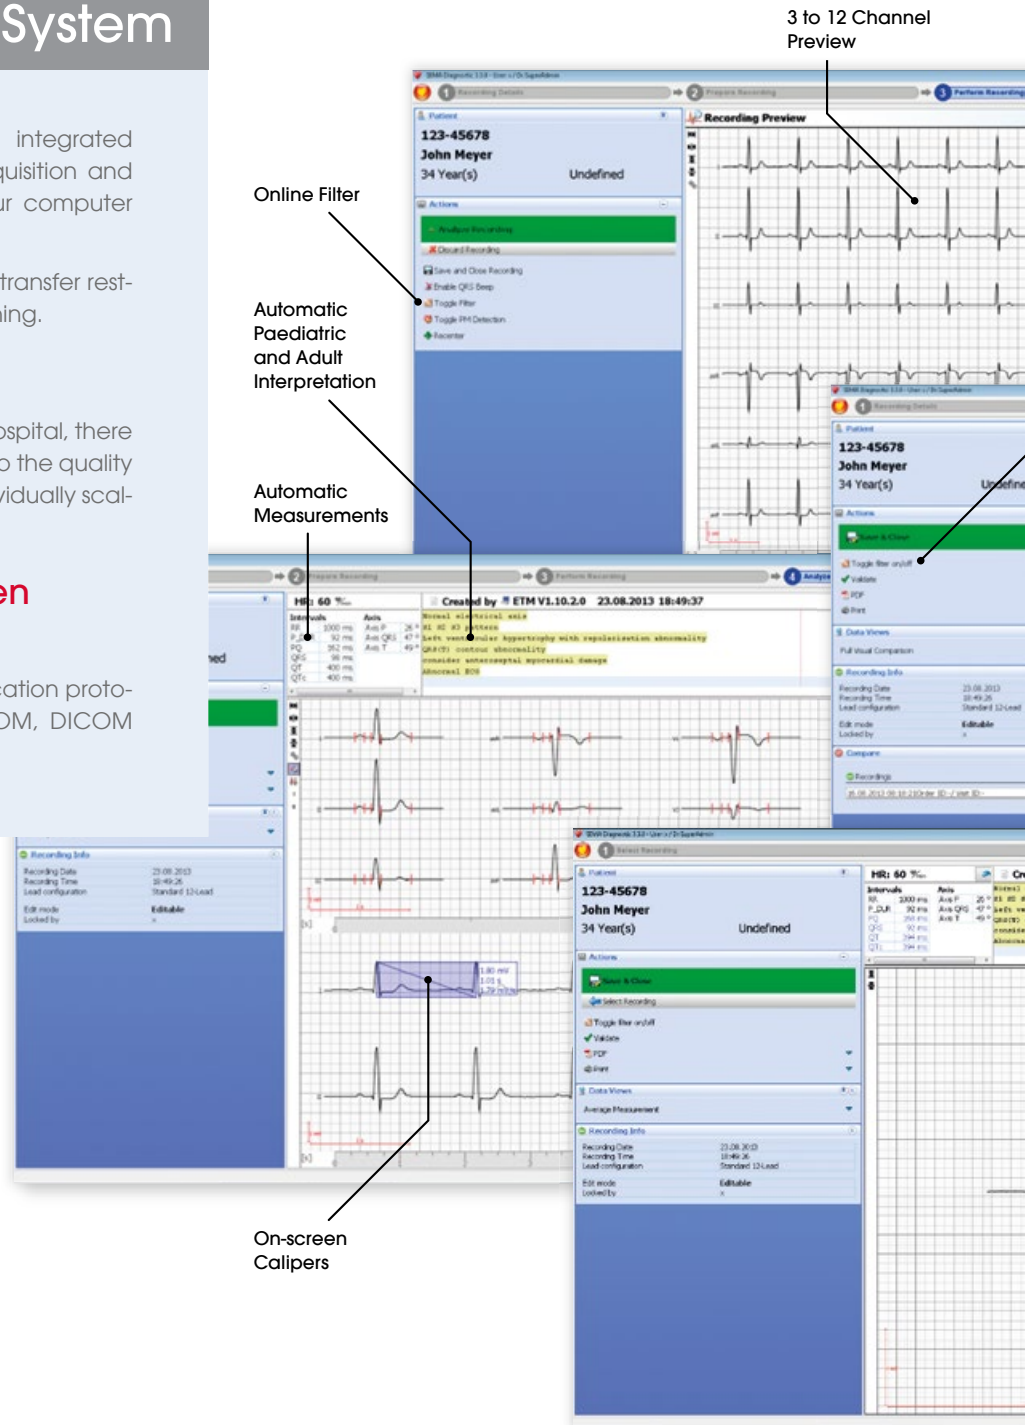

You can easily acquire, analyze, store and transfer resting ECG records. And that is just the beginning.

Scalable solution

Irrespective of the size of your practice or hospital, there is no room for compromise when it comes to the quality of diagnostic data. Therefore, SEMA3 is individually scalable and expandable.

Maximum flexibility with open system architecture

SCHILLER uses industry-standard communication protocols, including GDT, HL7, HL7 aECG, DICOM, DICOM Modality Worklist, XML and TCP/IP.

SEMA3 Solo

SCHILLER's all-in-one solution for general practitioners:

- no licenses
- minimal installation effort
- easy data management
- PDF export

SEMA3 Diagnostic

SCHILLER's solution for networked practices and hospitals:

- seamless integration with your HIS, EMR, PACS
- central database
- order management with worklists
- receiving patient master data in common formats
- export of results, reports and waveform data
- integration of additional SCHILLER ECG devices

CARDIOVIT MS-12 blue

Free to move with wireless ECG

With the introduction of the wireless acquisition module MS-12 blue, SCHILLER provides a new solution that greatly simplifies ECG acquisition.

- Free to operate in any environment, whether in confined or wide spaces. Never worry again about cable length!
- Motion artifact is minimized by eliminating the analog cable connection.

Clinicians will now be able to focus on what matters the most: patient care and ECG signal quality.

Small ...

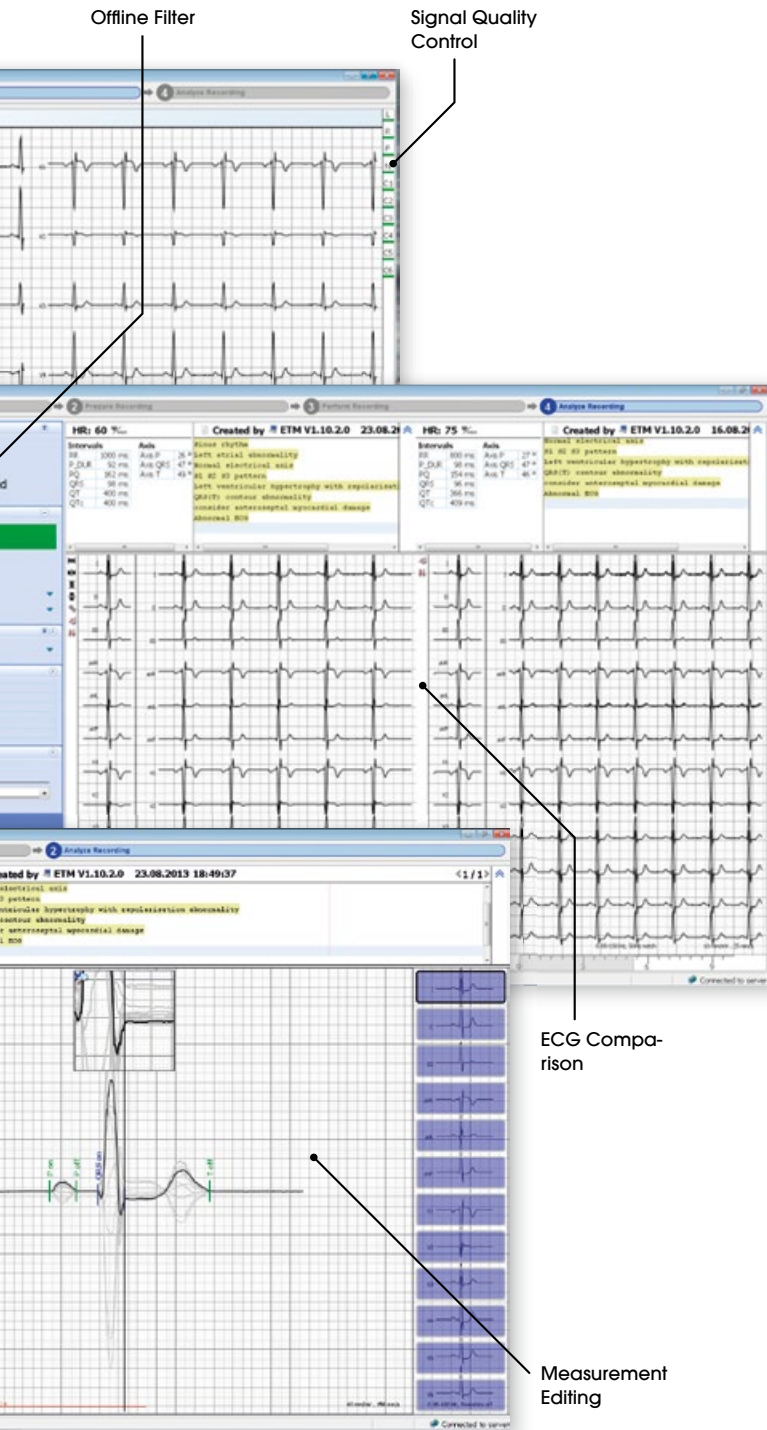

The MS-12 blue weighs only 115 g (batteries included) and fits in one hand.

- Easy to move from one room to the other or from bed to bed.
- Sits comfortably on the bed or patient's body during ECG acquisition.
- Extremely lightweight patient cable minimizes motion artifact and ensures optimal ECG quality.

... but powerful!

State-of-the-art technology provides efficient power management and best performance.

- One battery charge guarantees continuous operation for more than 36 hours.
- With the power-saving mode of the SEMA3 application, it is even possible to operate the MS-12 Blue for more than a week with one battery charge only!
- Operating costs are thus greatly reduced.

Easy patient hook-up

With the integrated ECG display, it is easier than ever to check battery status, electrode contact and signal quality during patient hook-up, right at the patient's bedside.

- Patients can be prepared wherever convenient, inside or outside the ECG room.
- Excellent solution for patients in isolated rooms.

Imagine the possibilities of an acquisition device with ECG display and lead-check capability, independently of any workstation!
